

Sastrería Manuel Fernández

Change list for the development team

Ryvo Digital · 21 May 2026

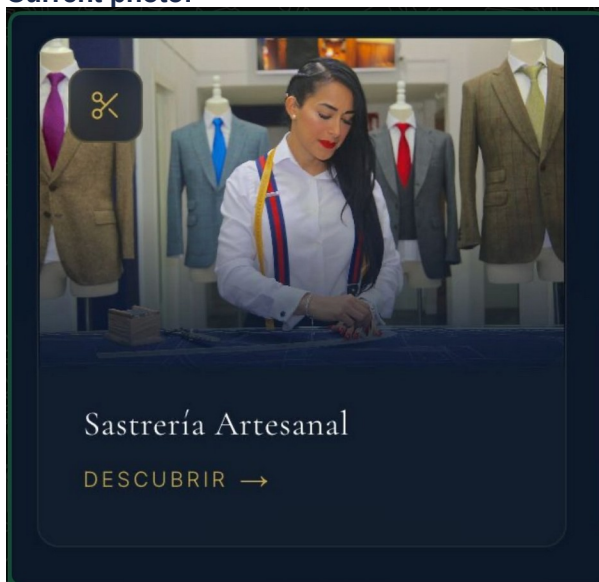

List of minor changes agreed with the client. Each item states what needs to be touched and, where relevant, includes the reference screenshot. Where a photo is being changed, both the current photo and the new photo are shown. On-site copy (titles, paragraph text, section names) is kept in Spanish, since that is what gets implemented.

Note: around 5 more changes are still to be added to this document later. These are the ones that can be started now.

1. “Sastrería Artesanal” card — change photo

Replace the card's current photo with the new one.

Current photo:

New photo:

2. “Crea tu Traje” card — change photo

Replace the card's current photo with the new one (cut pattern pieces laid out on the table).

Current photo:

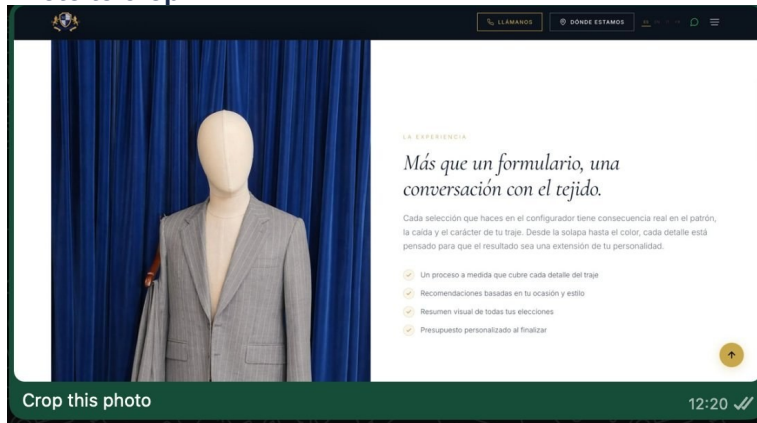

New photo:

3. “La Experiencia” section — crop the photo (do not replace it)

The photo is not being changed, only cropped. Crop the top portion (where it's just blue curtain) and the bottom portion so the image is tighter. The client noted there's too much empty space between the hero section and the text; a tighter crop removes that vertical gap.

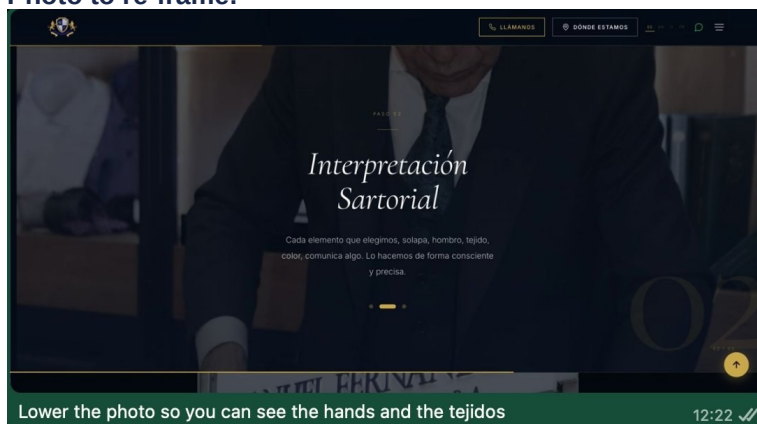

Photo to crop:

4. “Paso 02 — Interpretación Sartorial” section — lower the crop

Lower the photo’s crop/framing. Right now it shows the tailor’s face and chest; it should sit lower so it shows his hands and the fabric he’s cutting, not his face.

Photo to re-frame:

5. Title change — “Detalles Nupciales”

Change the title “Detalles Nupciales” to “Bodas Memorables”. Text only, no image change.

6. “Estilos de Ceremonía” section — reorder and resize cards

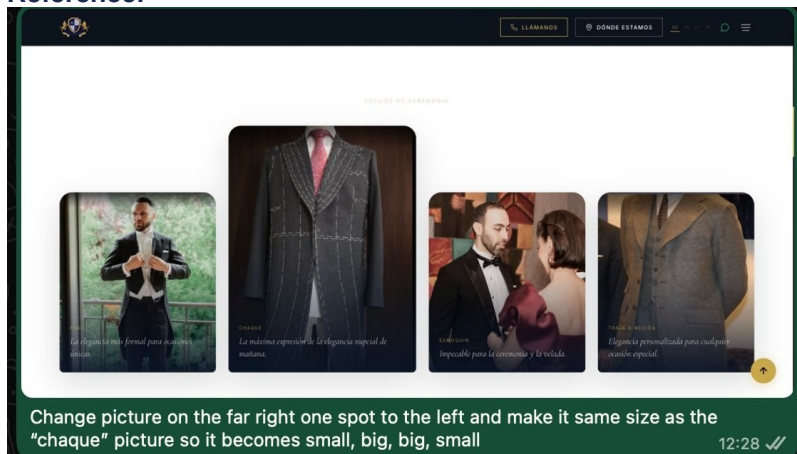

There are 4 cards. Current sizing is: small, big, small, small.

Move the far-right card (“Traje a Medida”) one position to the left and make it the same size as the big card (“Chaqué”). “Esmoquin” moves to the far right and becomes small.

Final result: **small (Frac), big (Chaqué), big (Traje a Medida), small (Esmoquin).**

To confirm with the client: this assumes Esmoquin gets bumped to the far right and shrinks to small. Worth verifying before building.

Reference:

7. Stripe — move from sandbox to production

Switch Stripe from sandbox mode to live mode and connect it to the business bank account. *Bank details will be provided separately and securely to whoever configures the payment integration (not included here for security reasons).*

8. Before / After slider — add photos

In the before/after slider section (the one you drag with the arrow), set these two photos:

BEFORE:

Half-made jacket, hand-basted with white basting threads visible.

AFTER:

Finished grey herringbone jacket on the mannequin.

9. “Manuel Fernández” section — change the second paragraph

Of the three paragraphs under the title, only the second one changes (the one starting “Manuel absorbió no sólo la técnica...”). The first and third stay the same.

New text for the second paragraph (Spanish, as it appears on site):

Manuel Fernández, la experiencia no se mide solo en años, sino en cientos de prendas construidas a mano, clientes satisfechos y una dedicación absoluta a cada detalle. La trayectoria del sastre Manuel Fernández se ha forjado trabajando con algunos de los clientes más exigentes, perfeccionando un oficio donde la elegancia, el patrón y el saber hacer convierten cada creación en una pieza única. Porque un verdadero sastre se construye de la A a la Z, puntada a puntada.

10. “Experiencias Reales” section — Google reviews

Three tasks in this section:

- Connect the real Google reviews (live integration, not static text).
- Improve the design / format of the review cards (including how to handle long reviews: truncate with a “read more” or use a uniform card height; right now the text gets cut off at the bottom).
- Decide how many reviews to display.

Reference:

11. “Entretelado a mano” section — change photo

Change the photo in the “Entretelado a mano” placeholder to the new one. The team will know which one it is because the placeholder title states it explicitly.

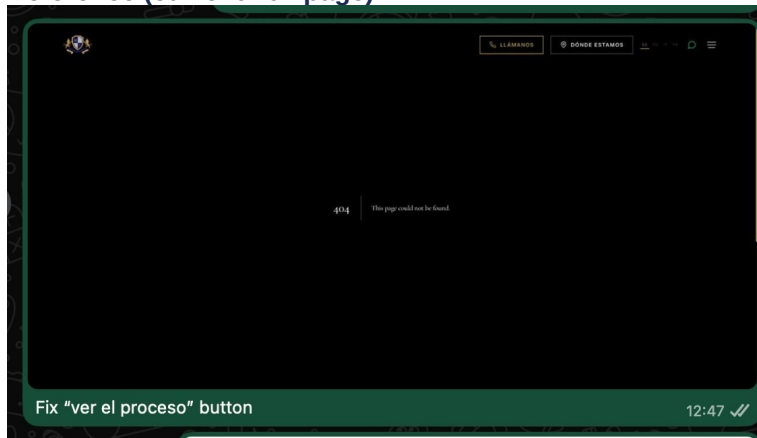

New photo:

12. “Ver el proceso” button — fix broken link

The “Ver el proceso” button leads to a 404 page (“This page could not be found”). Point it to the correct destination. Also, audit all other buttons and links across the site to make sure none are broken or lead to a dead page.

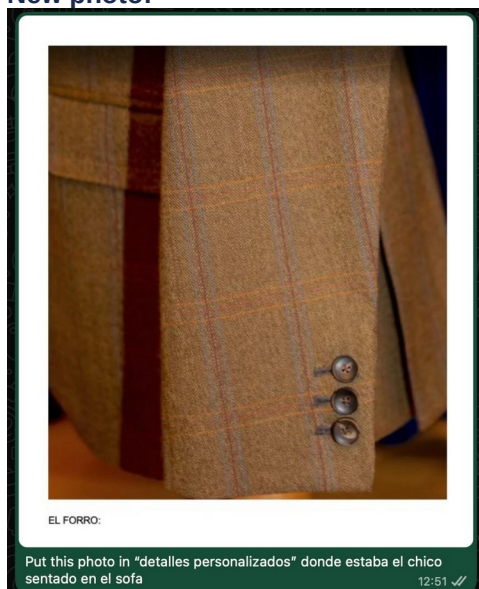

Reference (current 404 page):

13. “Detalles Personalizados” section — change photo

Replace the current photo (the guy sitting on the sofa) with the new one: close-up of the windowpane-check jacket cuff showing the buttonholes and buttons.

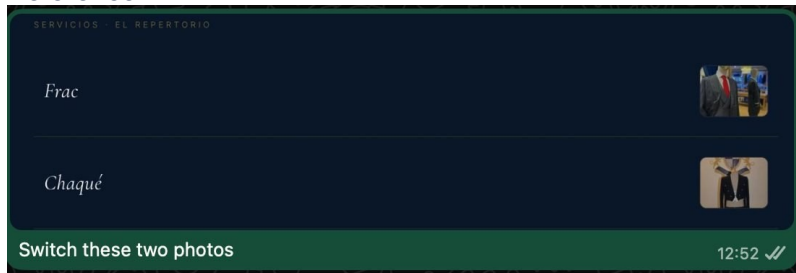

New photo:

14. “Servicios · El Repertorio” list — swap Frac / Chaqué photos

Swap the two thumbnail photos for “Frac” and “Chaqué”: the one currently on “Frac” goes to “Chaqué” and vice versa. The labels stay where they are; only the images swap.

Reference:

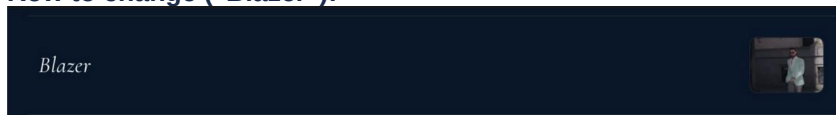

15. “Servicios · El Repertorio” list — change “Blazer” photo

Replace the current “Blazer” thumbnail (guy in the light blazer) with the new one: navy blazer with gold buttons on a mannequin in the shop window.

New photo:

Row to change (“Blazer”):

16. “Servicios · El Repertorio” list — change “Chalecos” photo

Replace the current “Chalecos” thumbnail (close-up of the brown jacket) with the new one: man adjusting his navy tie, wearing a light grey waistcoat under a dark jacket with French cuffs and cufflinks.

New photo:

Row to change ("Chalecos"):

Chalecos

Pending: $\approx$ 5 more changes to be added later.
